Design and Implementation of an Intelligent Post—Editor .......................................................... Huang Heyan, Chen Zhaozong (129)

The Inter—Clause Optimization Technique in the Implementation of PROLOG—DBMS Systems .......................................................... Li Lei, Zuo Wandi, Li Xichun (136)

An Improved Test Sequences Generation Method Based on Formal Description Technique .......................................................... Zhang Lidong, Liu Jiren, Li Huatian (142)

An Open Model of Dynamic Linking for Hypermedia .......................... Zhong Yuzhao, Ran Jianguo (148)

Study of Cost—Error Relationship in A* Tree—Searching Algorithm .......................................................... Jin Hai, Xie Wei (155)

The Special Real—Time Parent System and Real—Time Screen Management .......................................................... Xing Guoguang, Fan Zhihua, Xu Boyi (159)

The Principles and Implementation of Analogical Transfer .......................................................... Li Bo, Luo Yulong, Zhao Qinping (164)

A Method for Planning the Path of Mobile Robot Moving on General Terrain .......................................................... Wang Hong, Wang Xuefu, Zhang Bo, San Jianguang (173)

Knowledge Clouds and Knowledge Acquisition .......................................................... Cao Cungen (179)

Defining Real Time Semantics by Simulation .......................................................... Han Yan (186)
